Enabling Evolution

OPERA OMNIA

Leading the Next Generation of
Labelling Machines

OPERA OMNIA machine is the new generation of fully modular labelling machines, suitable for any kind of technology.

OPERA OMNIA

The new generation of modular labeling machines

OPERA OMNIA IS THE NEW GENERATION OF FULLY MODULAR LABELLING MACHINES, SUITABLE FOR ANY KIND OF TECHNOLOGY, INCLUDES 20 YEARS OF LABELLING KNOW HOW AND REPRESENT THE NATURAL EVOLUTION OF THE ENTIRE RANGE OF LABELING MACHINES WE HAVE DESIGNED UP TODAY.

FLEXIBILITY

Possibility to decorate the same container with one or more labels of the same technology or with a combination of different labelling technologies: cold glue, roll-fed, adhesive and hot melt.

Moreover, Opera Omnia machines can **easily be installed in various configurations**, depending on the space available. Outstanding machine design allows installation on both new and existing production lines

PLUG & PLAY SOLUTION

Our Technology gives the possibility to considerably **reduce the size of the machine** and at the same time take advantage of a **simpler installation** within new or existing lines.

ERGONOMIC DESIGN

The **excellent accessibility to the main carousel and to the labelling stations** allows to reduce the changeover time, ease of cleaning and maintenance, have easier access to the infeed screws and safely operate and perform activities.

70,000 bph

Max. speed

MAIN FEATURES

- **High-output labeling precision**
- **Ergonomic** for unrestricted access to all machine parts, ensuring easy size changeovers and faster maintenance
- **Quick, flexible label changeovers**
- Ready in the 4 main labelling technologies: Rollfed, Hot Melt, Self Adhesive, Cold Glue
- Available in **7 diameter sizes** and can accommodate any type of labeling station, fixed or removable, as well as any accessory
